Diagnosis and Advice

Is the task implementation aligned with the description?

if Current Tasks can Meet the Requirements.

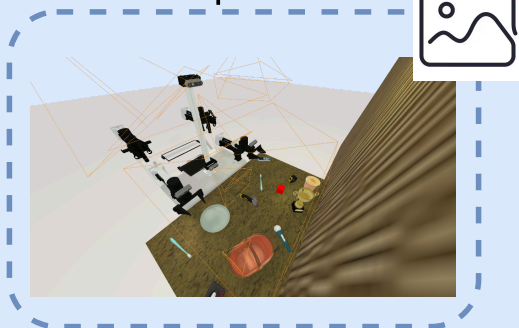

```
# Task: BeatBlockHammer  
class BeatBlockHammer(Task):  
    ...  
    def load_Actor(self):  
        self.hammer = Actor("020_hammer", mass=1e-3, pose=Pose(...))  
        p = rand_pose(..., z=0.76, avoid_center=True)  
        self.block = Box(pose=p, half=0.025, color="red", static=True)  
        ...  
    def check_success(self):  
        ...  
        return near(self.hammer.fp(0).xy, self.block.fp(1).xy, 0.02)  
        and contact(self.hammer, self.block)
```

Output to Execution Stage

Simulation Engine
